

# 1000

## *Fast Growth*

## MAKING MONEY IN TOUGH TIMES

**It may be a rather cold economic climate out there in broad terms, but in the solution provider world, it's heating up.** Our 2009 list of the top 100 integrators and VARs found that among these companies, average revenue was \$192.8 million, up from an average of \$106.4 million on our 2008 list.

The Fast Growth list saw a bit of movement from 2008 to 2009, with last year's No. 1 integrator, NWN Corp., not appearing this time around. Newcomer BlueWater Communications took the top spot. Founded only three years ago, BlueWater increased its sales from \$1.9 million in 2006 to more than \$70 million in 2008.

How much is the Fast Growth 100 worth? All told, \$19.3 billion. That's almost the gross domestic product of Jordan.
